Experience	<b>iOS Developer - Meta, Inc.</b>	03/2019 – 03/2022
	<ul style="list-style-type: none"><li>Owned all aspects of friending surfaces in the iOS app (friends tab, people you may know, profile friends list, and friending notifs). Fixed bugs, improved performance, added new features, and managed xfn integrations</li><li>Built a feature for sending messages after accepting a friend request, which increased message threads by 1M/day</li><li>Led graph curation workstream, which helps users to easier manage their friend graph through bulk unfriending</li><li>Implemented PYMK in stories, which included adding a generic system for component based stories</li><li>Overhauled the experiment review process within the team, adding standardized templates and processes, and making it easier and more consistent for xfn partners to get feedback on experiments, and unblock them quicker</li></ul>	
	<b>Full Stack Software Developer - Ultimate Software, Inc.</b>	06/2016 – 04/2018
	<ul style="list-style-type: none"><li>Developed Ultimate Softwares brand new HCM SaaS solution using an event sourced microservices architecture</li><li>Worked on all parts of the stack including EventSourced Java/Spring Microservices, GraphQL adapter, and a hybrid mobile application using Javascript, Angular 1.5 (Components), and Ionic</li></ul>	
	<b>Software Engineering Intern - Ultimate Software, Inc.</b>	05/2015 – 08/2015
Projects	<ul style="list-style-type: none"><li>Developed administrative dashboard as part of the new ACA feature being put into production in the next release cycle; The dashboard provides important information to allow clients to view and manage their ACA compliance</li><li>Created modular back-end using C#, .NET, and MSSQL, and integrated it with a dynamic UI built with JavaScript</li></ul>	
	<b>IOS Developer - Starter Space</b>	05/2014 – 05/2015
	<ul style="list-style-type: none"><li>Developed multiple applications for both in house and external clients, Haulbox, Proximity, Kiwee, etc</li><li>Built custom libraries for reuse across applications including a Barcode Scanner, Networking Library, Fitbit API Integration, Truevault HIPPA API Integration, Image Caching System, Login/Registration Pages, and more</li><li>Researched and tested various Bluetooth LE beacons for use in microlocation software and created an application to demonstrate different uses for the technology</li></ul>	
	<b>IOS Developer - Bafit, LLC</b>	08/2014 – 01/2015
	<ul style="list-style-type: none"><li>Developed a local social app that allows users to meet new people through video sharing</li><li>Built video playback and instant messaging features utilizing AWS, Jabber, and XMPP messaging framework</li></ul>	
Education	<b>SplitStreamr - Swift/iOS</b>	<a href="https://git.io/vS7j4">https://git.io/vS7j4</a>
	Music streaming application that splits the data cost of streaming music between multiple devices, by using web sockets and mesh networking to distribute piece of data to individual devices before combining on a single device	
	<b>Rotameeting - Swift/iOS</b>	
	Asynchronous video meeting software that allows users to create and participate in meetings on their own time.	
Education	<b>Emojr - Swift/iOS</b>	<a href="https://git.io/vS7ju">https://git.io/vS7ju</a>
	Music streaming application that splits the data cost of streaming music between multiple devices, by using web sockets and mesh networking to distribute piece of data to individual devices before combining on a single device	
	<b>Bachelor of Science, Computer Engineering (Software)</b>	May 2016
	University of Florida
